# PDFs in fileSMART Archive Open in a Separate Window

## If you are using Adobe Reader 10

1. Open Adobe Reader 10 and go to Edit > Preferences > Internet
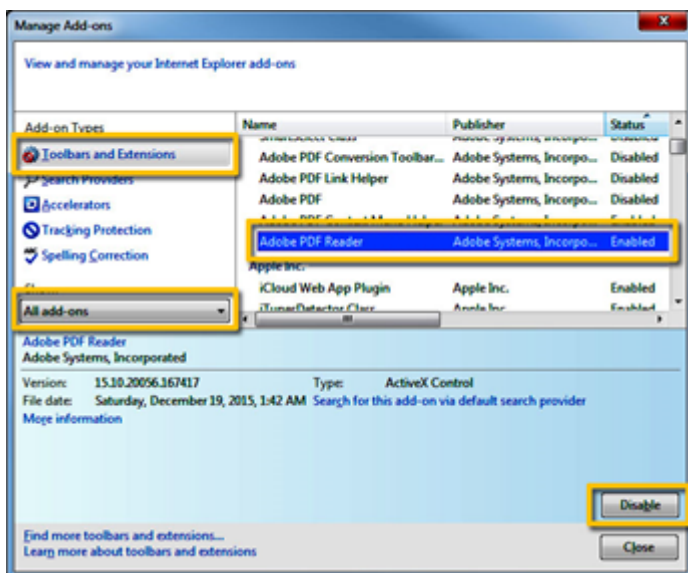

2. Tick 'Display in Browser'

If you are using Adobe Reader XI or later

Adobe Reader XI and later versions don't have the preference setting described above. The 'Display in Browser' setting is controlled by the settings in Internet Explorer regardless of the web browser that the customer actually uses.

1. Open Internet Explorer, and choose **Tools** > **Manage Add-ons**.

2. Under Add-on Types, select **Toolbars and Extensions**.

3. In the Show menu, select **All Add-ons**.

4. In the list of add-ons, select Adobe PDF Reader.

   NOTE: If you do not see the Adobe PDF Reader add-on, try the other options on the menu. For example, on some systems, the add-on appears when you select Run Without Permission.

5. Click the Enable or Disable button (it toggles depending on the status of the selected add-on):

   - **Enable** sets the Adobe PDF Reader add-on to open PDFs in the browser.
   - **Disable** turns off the add-on so it does not open PDFs in the browser.

   NOTE: If the add-in is already enabled, disable it, restart IE, enable it, restart IE.

For more information, see the Internet Explorer help topic: Manage add-ons in Internet Explorer - http://windows.microsoft.com/en-IN/internet-explorer/manage-add-ons#ie=ie-11
