

How to Relocate a File Smart Server

Overview

A File Smart Server relocation is performed by MRI Software's Project Management team. This will incur a one off fee and must be scheduled according to availability, please email ps.rockendprojects@mrisoftware.com to discuss your relocation.

The following information will help you prepare for your relocation

- Ensure the new server meets the system requirements: [System Requirements - File Smart](#)
- REST Professional or Strata Master can be relocated by MRI Software, or by your IT Provider

Refer instructions: [How to Relocate a REST Professional Database](#) and [How to Relocate a STRATA Master Database](#)
