# Asbestos Information and Inspection Report in REST Professional

The Property Information tab now allows Asbestos Information to be recorded, based on legislative requirements in all states of Australia and New Zealand.

An Asbestos Inspection Report is also now available.

Asbestos information is available as export and merge fields.

Prerequisites

To enable the Asbestos Management to appear on the Property Information Tab, REST Professional V16.5.03 or above is required.

Changes to Screens

The Property Information tab now allows Asbestos Information to be recorded under Asbestos Management.

Asbestos Management			
Asbestos Present	Yes	Last Inspection Date 08/11/17	Next Inspection Date 08/11/18
Label Location	Back Shed		Register Date 08/11/17
Comments	Quote required to replace back shed		

Overview

The Property Information tab allows Asbestos Information to be recorded, based on legislative requirements in all states of Australia and New Zealand. The following information can be saved on the Property Information Tab:

- Asbestos Present (Yes, No, Not Applicable)

- Last Inspection Date

- Next Inspection Date

- Register Date (Date added to the Asbestos Register)

- Label Location

- Comments

There is an Asbestos Inspection Report available:

- Reports > Property > Property Information Report > Asbestos Report to display asbestos details at property level

- Asbestos information can be exported and all fields are available to be used as merge fields.

Report Example

ASBESTOS INSPECTION REPORT
