

Macquarie Direct Debit

Summary

Strata Master Version 14 delivers integration with Macquarie's Direct Debit, allowing your lot owners the opportunity to opt into Direct Debit themselves from their nominated bank accounts.

Macquarie Direct Debit enables you to offer an additional service to your portfolio, as well as providing the following benefits to your agency:

- Reduced arrears: payers are charged as required directly from Strata Master
- Offers convenience and peace of mind: Where Owners may be overseas or just want the convenience of direct debit, levies, special levies, and invoices can be debited when they fall due directly from Strata Master
- Digital and efficient: Unlike typical paper-based direct debit authorities that need to be stored for 7 years, DEFT Biller initiated direct debit utilises a digital authority removing the need for paper forms and filing.
- Safe and secure: Strata Master does not store any bank account or credit card information, DEFT stores a digital wallet that owners can update when required.

Processing Direct Debit Requests

Note: You should process a Direct Debit request run every day just after you have processed your downloaded bank statement and dealt with any exceptions. This will ensure that when you process your Direct Debit requests, any contacts that have just signed up to the Direct Debit will be included, and any payments that have already been made are receipted in Strata Master.

To process a Direct Debit request run, navigate to Accounting and select *Direct Debit*. This will load the below screen

Levies due up to date: Today's date will be populated here by default, this means that all levies and invoices due up to today's date for lots that have enabled Direct Debit, will be included.

Note:

- You can change this to an earlier date, but you cannot process payment for levies or invoices that are due in the future.
- If there are multiple levies due, only the most recent will be displayed in the grid, with all outstanding levies totalled together in the 'Levies in Arrears' column.
- If a Lot has two levies due on the same day, these will be shown on separate lines, with any levies in arrears displayed on the oldest levy based on time of posting.

Include Levies in Arrears: This will be selected by default, but you have the option to un-select if required. When selected, any Levies in Arrears will be included in the Direct Debit Request.

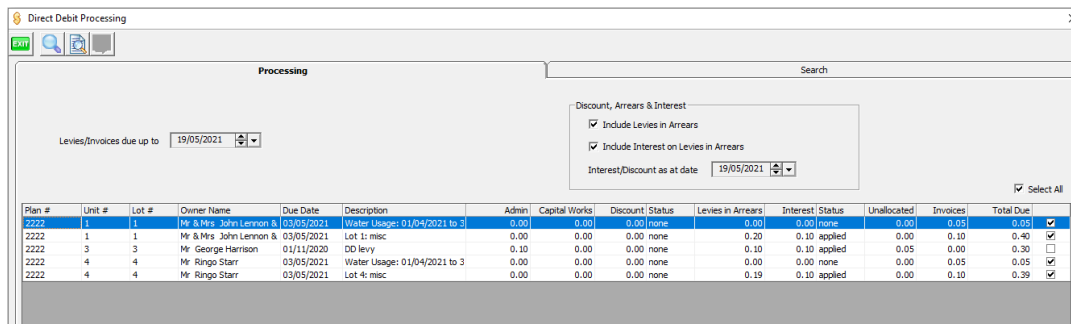

Include Interest on Levies in Arrears: This will be selected by default, but you have the option to un-select if required. When selected, any interest that is due for Levies in Arrears will be included in the Direct Debit Request.

Interest/Discount as at date: Today's date will be populated here by default; this means that all interest or discounts applicable at this date will be included in the Direct Debit Request.

Note:

- You can change this to an earlier date, but you cannot apply interests or discounts for a future date.

When you have entered your search criteria, click on the *Search* button.

The grid will now be populated with the search results based on the criteria you have entered.

You can use the checkboxes on the far right-hand side of the grid to de-select any levies if required. By default, all levies will be selected.

You are also able to sort the results by a particular column, simply by clicking on the column heading.

Type

The type column will convey a breakdown of each row, outlining what type of transactions are included in the Direct Debit. An 'L' will show for a Standard Levy, an 'S' for a Special Levy, and an 'I' for an Invoice. Rows consisting of multiple levies or invoices may show a combination of L, S, and I.

Discount

The Discount column will be populated with any discount associated with the most recent levy displayed in the grid and any levies in arrears.

The status column next to the discount column displays the status of the discount as it relates to the levy.

None = a levy discount was not added at the time the levy was struck

Applied = the date in the *Interest/Discount as at date* field was within the levy discount grace period and the levy discount has been applied

Expired = the date in the *Interest/Discount as at date* field was not within the levy discount grace period and the levy discount cannot be applied.

Interest

The interest column will be populated with any interest associated with the levy displayed in the grid and any levies in arrears when included.

The status column next to the interest column displays the status of interest as it relates to the levy.

Unallocated

The unallocated column will display any lot prepayments that have not yet been allocated to a levy, invoice, or interest. For lots with unallocated amounts, these will need to be allocated in the receipting screen by entering a Nil Receipt, prior to processing direct debit for that lot.

None = When *Include Interest* has been selected and no interest is due

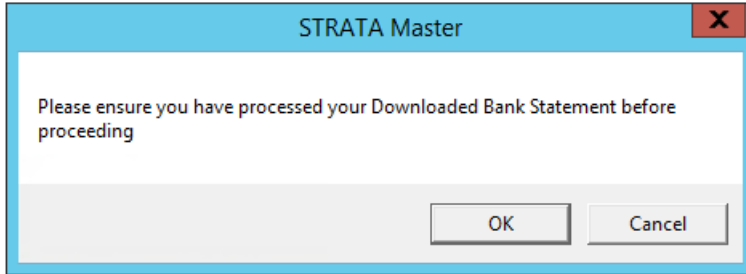

Applied = When *Include Interest* has been selected and there is no interest due for the levy or any levies in arrears (when included)

Removed = When *Include Interest* has not been selected but interest was due for the levy or any levies in

arrears (when included)

Once you have reviewed the information in the grid, and you are ready to submit the request click the *Preview* button.

Clicking the *Preview* button displays the following prompt:

Selecting OK will generate a Direct Debit Request report preview which details all the Direct Debit requests you are sending to Macquarie.

Please note, the payments received via Direct Debit will be allocated based on your current Receipt Allocation Order in Configure > Agency > Association Type.

Selecting *Process* displays the following prompt:

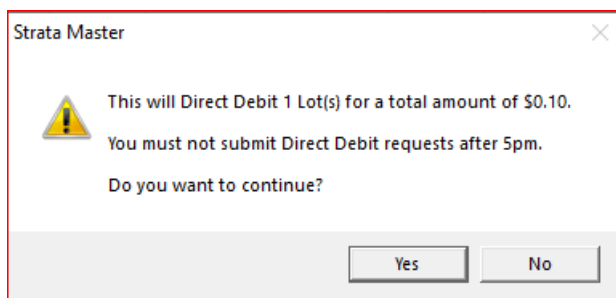

Selecting OK displays the Terms & Conditions

Selecting OK accepts the terms and conditions.

The next prompt displays the number of lots the Direct Debits will be processed for, and the total amounts.

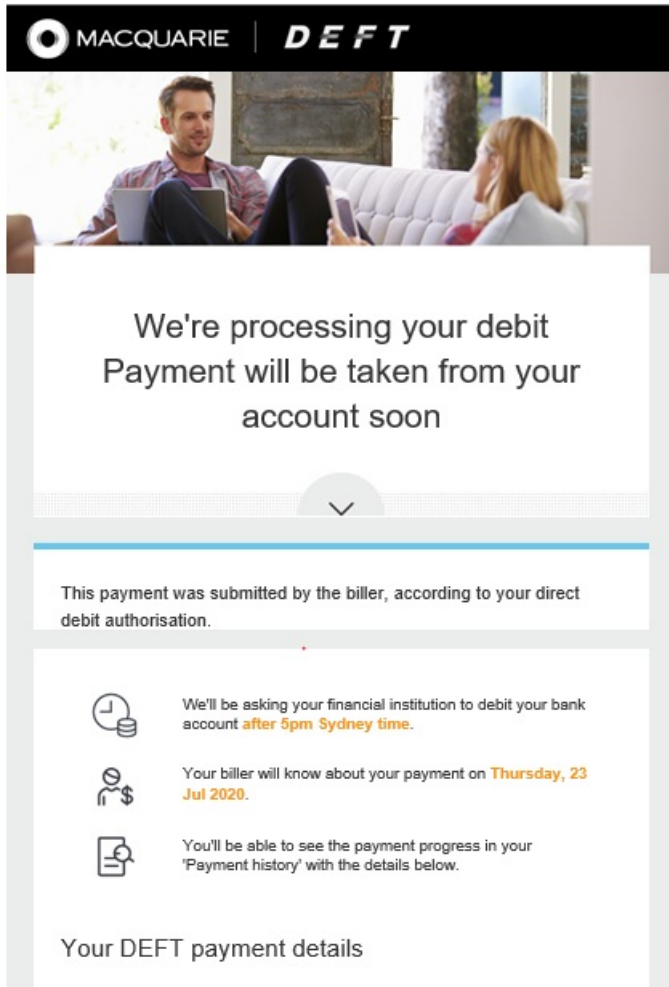

Selecting Yes will send the Direct Debit requests to Macquarie.

You will then receive a confirmation that the processing has been successfully completed.

The *Direct Debit Request Report* will be automatically saved in the Direct Debit folder on your C: drive should you need to refer to this later.

Your contacts will receive an email from DEFT notifying them that the payment will be taken from their account soon.

Saving A Copy of The Direct Debit Report

As mentioned above, you do not need to manually save this report. It will be automatically saved at the time you process the Direct Debit requests. This is saved in the local app path on the local machine for the user and not the shared network for the user.

This means that reports will be stored on various machines that have been used for direct debit processing.

Receipting Direct Debits

Levy payments will appear in your TXN file the next day regardless of whether the contact has funds in their account.

Please note, the payments received via Direct Debit will be allocated based on your current Receipt Allocation Order in Configure > Agency > Association Type.

If an owner has insufficient funds in their bank account, the payment will be dishonored in a subsequent TXN file.

Dishonoured Direct Debit

Viewing the Dishonoured Record on the Download Report

When an owner has insufficient funds in their bank account, the dishonored payment will be included in the TXN file.

If Strata Master finds the matching transaction, the payment will be automatically dishonored and reversed and will display on your download statement.
