SMS Credentials Error in Strata Master

This error will appear when a new user tries to send an SMS message without being configured in Strata Master Configure > Third Party Services > Rockend SMS Online.

This error can also appear if a current user has a change of email

The Error Message

AINT SIMIS		/
Â	Your MRI SMS credentials could not be verified. Please check you configuration settings and contact MRI Support if the problem p	ified. Please check your oport if the problem persists.
-		

To Check Configuration of Users for SMS

1. Select Configure > Third Party Services. The following screen opens

S. Third Party Services - Read Only Mode	×
Third Party Services	
Macquarie Direct Debit Configuration	
MRI Strata Connect	
Rockend SMS Online	
StrataVote	

2. Double click on Rockend SMS Online. The following screen opens. In your case you will most likely have numbers and characters showing in the Access Token and token ID fields beside users names. These are the Users **'Credentials**'.

Rockend SMS Configuration					
Name Clark Kent Gerald Manager Lex Luthor	Access Token	Token ID			

3. If the relevant Users Access Token and token ID fields are blank as above, then contact your service provider, contact Edgility on 1300 764 451 or outside Australia on +61 2 95185955. Provide them with the Users name and email address so they can provide you with Access Token and Token ID for that User.

4. Then come back to this screen, highlight the relevant user and enter the details where indicated below. You can cut and paste the characters given however ensure there are NO BLANK SPACES before or after the characters given.

🖏 Rockend SMS Configuration - Read Only Mode					
L Select All					
Name	Access Token	Token ID	1		
Clark Kent			I		
Gerald Manager			Ш		
Lex Luthor			I		
Meg Manager			L		
Roy Reception			L		
Sam Strata			I		
TEST			L		
Trainee McTrainer			I		
			I		
			I		
			I		
			I		
			I		
			I		
			I		
			I		
			L		
			L		
- Read Only			1		
inclusion by					
Access Token					
Token ID					
Include Inactive Users					

5. If the user already has Access Token and Token ID, call Edgility to check there has been no change to the email address or any other reason why the 'credentials' would not be current.
